

Sales Performance Analysis Report (2023 vs 2024)

Power BI Dashboard Project

1. Executive Summary

This report analyzes sales performance using Power BI dashboards built from the Sales Data 2023 and Sales Data 2024 datasets. The dashboard provides insights into sales, orders, customers, product categories, geographic performance, and year-over-year growth. The analysis shows significant business growth in 2024 across all major KPIs.

KPI	2023	2024	Growth
Total Sales	\$501,987	\$688,560	+37.17%
Total Orders	923	1,255	+35.97%
Quantity Sold	5,083	7,019	+38.08%
Customers	509	582	+14.34%

2. Dashboard Overview

KPI Dashboard

Provides total sales, total orders, quantity sold, total customers, monthly trends, target vs actual performance, and quarter-wise filtering.

Comparison Analysis Dashboard

Provides product category sales comparison, order distribution, geographic sales analysis, top customer analysis, and interactive slicers.

3. Sales Performance Analysis

2023 Total Revenue: **\$501.99K**

2024 Total Revenue: **\$688.56K**

Growth: **37.17%**

Monthly sales trends indicate strong performance in June, August, and October, with a temporary dip in July followed by quick recovery.

4. Product Category Analysis

Category	Sales
Clothing	\$152.22K
Furniture	\$144.75K
Electronics	\$140.32K
Toys	\$139.11K
Books	\$112.17K

Clothing generated the highest revenue, followed by Furniture, Electronics, and Toys. Books contributed the least sales and can be targeted through bundle offers or promotions.

5. Geographic Sales Analysis

Rank	City	Sales
1	San Jose	\$80.36K
2	New York	\$79.93K
3	Philadelphia	\$69.61K
4	Houston	\$69.04K
5	Los Angeles	\$67.77K

California cities contribute significantly to revenue, while New York and Philadelphia also perform strongly, indicating a balanced regional sales distribution.

6. Target vs Actual Performance

Metric	Target	Actual	Achievement
Sales	\$501.99K	\$688.56K	137%
Quantity Sold	5,083	7,019	138%
Orders	923	1,255	136%
Customers	509	582	114%

7. Business Insights & Recommendations

- Strong year-over-year growth across all KPIs.
- Revenue exceeded target by approximately \$186.57K.
- Balanced product portfolio reduces dependency on a single category.
- Books category needs improvement through promotions and bundles.
- Introduce loyalty programs and personalized offers for top customers.
- Expand marketing efforts in top-performing cities such as San Jose and New York.

8. Conclusion

The Power BI dashboard demonstrates strong business growth from 2023 to 2024. Sales increased by 37.17%, orders by 35.97%, and quantity sold by 38.08%. Clothing emerged as the top-performing category, while San Jose and New York were the strongest-performing cities. The organization exceeded all major performance targets, reflecting effective sales and operational execution.
